

About PubliBike

PubliBike is a Swiss quality self-service bicycle service offering practical, healthy, sustainable and environmentally friendly mobility. A mobility solution from PostBus, supported by cities, municipalities and companies.

PubliBike is committed to promoting soft mobility and sustainable development, raising awareness among citizens and companies, helping to keep traffic flowing and reducing pollution.

Sustainability of residential areas

Whether they are renovated or newly built, on the outskirts or in the heart of the city, so-called sustainable neighbourhoods must meet a wide range of environmental and social requirements, while being economically affordable for public authorities and profitable for project owners. Preserving natural resources, strengthening social ties, offering quality public spaces accessible to all, promoting soft mobility and encouraging functional diversity are just a few examples.

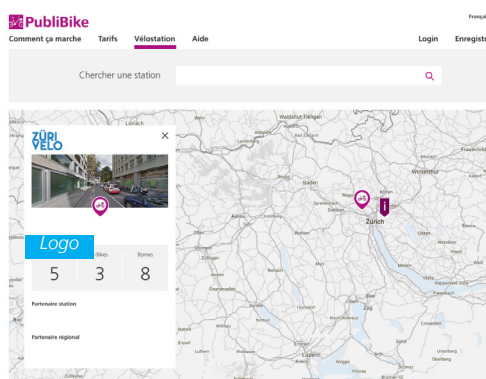

How can you participate?

Sponsor a PubliBike station and benefit from direct and indirect advantages for your residential area.

Our services

Infrastructure and subscriptions

- A station in front of or within your neighbourhood.
- Your logo in white on the totem according to the network, in color in our application and on the [website](#).
- Choice of station name.
- Bikes and e-bikes available 24/7.
- Subscriptions at preferential prices for your employees and residents, valid in all our networks.
- Fleet management and bike repair included 24 hours a day, 7 days a week.
